DANUBE INVA MX202

The INVA MX202 is compatible with Micro ATX and ITX motherboards, making it versatile and suitable for different system configurations. Its compact design allows for maximum utilization of available space without compromising expansion and customization capabilities.

In terms of storage capacity, the case can accommodate up to four hard drives, providing ample space for storing files, games, and other important data. This allows users to have a system with large storage capacity without sacrificing performance.

Furthermore, the INVA MX202 is compatible with graphics cards up to 330 mm in length. This means that users can install high-performance graphics cards without worrying about space limitations, ensuring a smooth and high-quality gaming experience.

The case also offers four expansion slots, along with two additional slots, providing the possibility to install multiple devices and expansion cards.
